

ROUTE 66

Quick tips and rules of thumb for installation of Route 66 Decor

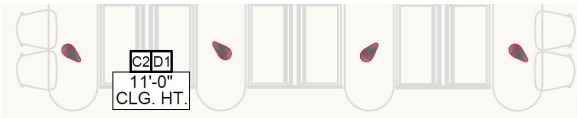

WOOD LOOK CEILING

- Laminate 2x4 wood look accent ceiling uses torsion spring system for concealed grid install
- 2x2 diffusers that fall within ceiling are painted per decor set by S&D
- T grid mains must be spaced 24" O.C. in wood accent ceiling area
- Read full Installation instructions guide for product details
- Saddle hardware only installed on grid mains to allow for consistent panel height installation
- Saddle hardware should be screwed into place into mains to assure no hardware shifting, which could result in mis-aligned panels
- Technical help can be provided by emailing mike@acousticalsurfaces.com or calling 952-466-8237
- **USG grid lead-time: 5 weeks to ship**
- **ASI wood look ceiling lead-time: 5 weeks to ship**

CHEESE SOFFIT & LIGHTING

- Touch up paint for cheese soffit provided with install package
- Read full Installation instructions guide for product details
- Diffusers and lighting above cheese soffit should be avoided
- Holes to be drilled on site for bumper pendant cords to pass through cheese soffit
- Handle chrome fixtures with care, keep covered during construction to avoid scratches on finish
- Sesame seed pendants mounted so point of the seed faces different directions for each fixture
- Decorative lighting ordered through CS Illuminations
- General lighting ordered through Security Lighting
- **McSeed pendant lead-time: 3 weeks to ship**
- **Bumper pendant lead-time: 4 weeks to ship**
- **ASI cheese soffit lead-time: 5 weeks to ship**

WALL FINISHES

- Custom powdercoat gold Schluter should be ordered from Schluter contact noted on decor drawings
- Gold Schluter only located between white tile and wainscot horizontally, never vertical
- Wall panels and trim are purchased by the GC from the décor company and must account for a 4 week lead time. For additional install information contact your decor company.
- **Schluter lead-time: 3 weeks to ship**
- **White wall tile lead-time: 3 weeks to ship**
